

RS-10005

AIR SWITCH FOR THE RS-13003 ELECTRIC HOSE ROLLER

Features:

- Operates using air pressure.
- Designed to withstand rough usage while maintaining consistent performance.
- Designed for faultless compatibility with the pedal bellows system.
- Activated by compressing air via the RS-10010 Air Bellows, keeping both hands free for hose handling.

General Description:

The RS-10005 is a compact pneumatic air switch designed to work seamlessly with the RS-10010 Air Pedal Bellows, enabling hands-free operation of the RS-13003 Electrical Hose Roller. The RS-10005 delivers controlled action via compressed air and kept simple by its pedal connection.

When the RS-10005 Air Switch is connected to the RS 10010 Air Pedal Bellows, pressing the bellows sends air pressure to the RS-10005. This triggers the hose roller's operation, enabling smooth and reliable functionality leaving hands free for hose handling. Upon release, the switch resets, stopping the roller and restoring control to the user's hands.

Electrical Ratings:

- 21A, 250 VAC, 1 HP 125 VAC, 2 HP 250 VAC
