

RS-12060

THE CLIP™ FIRE HOSE CARRYING HANDLE (1 to 4 inches)

Features:

- Compact design that fits inside pockets and on belt clips
- Compatible with 1 to 4 inches diameter hoses with single or double-wall construction
- Secure and comfortable rubber grip protects hands from pressure injuries and minimizes slippage
- Heavy-duty stainless-steel construction for rust-free performance for years to come

General Description:

The RS-12060 THE CLIP is designed to help firefighters secure and carry fire hoses measuring 1 to 4 inches in diameter. THE CLIP is constructed from stainless steel rod, which is impervious to rust or deterioration. In addition, a rubber handle helps to minimize discomfort while carrying hoses. THE CLIP is easily inserted into coiled hoses securing the last several turns to provide a safe way to manually: move, load, and transport hoses. THE CLIP has a compact design that offers a good grip for lifting hoses and helps reduce the risk of injury. Minimize the mess and worry with THE CLIP and simplify loading and unloading hoses from a rack.

THE CLIP is easy to use and requires minimal training to become proficient. Just push THE CLIP into a coiled hose and lift the hose by the handle. That's all it takes. Each RS-12060 is robust to withstand years of use and abuse. Built in the USA, this hose clip will provide years of trouble-free service and simplify hose management.

Mechanical Specifications:

- Width: 3-3/8 inches
- Top Length: 6 inches
- Bottom Length: 6-3/4 inches
- Weight: 2 lbs. 9 oz.

Frequently used with:

- RS-13003 Electric Hose Roller
- RS-13000/-04/-05 Gas Hose Rollers

Compatibility:

- Hose diameters: 1 to 4 inches

Material

- Body: Stainless Steel
- Rubber grip: Reinforced PVC tubing

Warranty

- Lifetime
