

RS-12095

HITCH MOUNT ASSEMBLY FOR GAS/ELECTRICAL ROLLERS

Features:

- Attaches to the roller frame via a square tubing holder and is locked in place with a retaining pin and cotter pin.
- Jam bolt keeps the unit level during operation.
- Allows for three mounting positions for the best working height: Up (+6 inches), down (–6 inches), or horizontal (level).
- Steel construction provides a stable, secure connection to keep your hose roller steady during operation.
- Included in the RS-13000, RS-13004, and RS-13005 gas-powered fire hose roller models, and available *separately* for RS-13003 electric hose roller.

General Description:

The RS-12095 Hitch Mount Assembly is designed for convenient attachment of The Rookie gas and electric fire hose rollers to a vehicle's hitch receiver.

The RS-12095 is compatible with the RS-13003 Electric Hose Roller, and the RS-13000, RS-13004, and RS-13005 Gas Hose Rollers. It is ordered *separately* for the RS-13003 Electric Hose Roller.

The RS-12095 Assembly includes hitch adapter, retaining pin, jam bolt, and cotter pin.
