

RS-13002

Fire Hose ReLoader Cradle

Features:

- Accommodates various hose sizes
- Handles designed for easy lifting and transporting of fire hoses
- Can be mounted and secured on the RS-13001 Portable Stand for easy transport and use of fire hoses anywhere and at any time
- Heavy-duty welded steel frame with powder-coated construction to withstand years of demanding use

General Description:

The RS-13002 fire hose ReLoader cradle is designed to transport and re-deck fire hoses after hose rolling are completed. The RS-13002 helps save time, energy, and personnel and reduce injuries so everyone can enjoy their time after work.

The RS-13002 is built with multiple ball-bearing, low friction rollers that make one-person operation for unrolling or flaking hoses. The hose support plate inside the reloader is adjustable and can accommodate different hose diameters. Two handles are found on each side of the ReLoader for easy lifting. The RS-13002 is also designed with a mounting slot and holes for mounting on the optional portable stand (RS-13001).

The RS-13002 fire hose ReLoader cradle is built in the USA and has a 5-year unconditional warranty. The Rookie fire hose cradle will provide years of trouble-free operation and simplify hose management to save time and labor and reduce lower back discomfort and injuries.
