

# RS-13012

## Portable Stand with ReLoader Assembly

### Features:

- Includes the RS-13011 Portable Stand and the RS-13002 ReLoader
- RS-13002 mounted and secured on the RS-13011 Portable Stand for easy transport and use of fire hoses anywhere and at any time
- Accommodates various hose sizes (RS-13002)
- Flat-free tires and maneuvering handle for easy and safe transport (RS-13011)
- Heavy-duty steel side panels and a handle with a powder-coated structure to stand up to any job

### General Description:

The RS-13012 portable stand with ReLoader assembly is designed to minimize fatigue and discomfort and reduce injuries when rolling fire hoses so that you can enjoy your time after work. The RS-13012 portable stand and ReLoader assembly is used to transport and re-deck fire hoses after hose rolling is completed.

The RS-13012 includes the RS-13011 portable stand and the RS-13002 ReLoader. The RS-13011 portable stand is an assembly kit with all the main parts that you need to put it together. It includes tools that enable you to assemble the stand components without additional tools. The main parts of the RS-13011 include four flat-free wheels, left and right side plates, front and back plates, a handle for moving the stand, and two sets of axles for the front and rear wheels.

The RS-13002 ReLoader is built with multiple low friction rollers that facilitate one-person operation for unrolling or flaking hoses. The hose support divider is adjustable to accommodate different hose diameters. Two carrying handles are located on each side of the ReLoader for easy lifting. The RS-13002 is also designed with a mounting slot and holes for mounting on the RS-13001.

### Mechanical Specifications:

- Width: 31 inch
- Height: 44-1/4 in
- Length: 40-1/2 in
- Weight: 215 lbs

### Parts Included:

- RS-13011 Portable Stand
- RS-13002 ReLoader

### Material

- Body: Powder-coated steel

### Warranty

- Five (5) years
