

# RS-13021

## Dual Electric Hose Roller (1.5 or 2-inch, 50-ft. Hoses)

### Features:

- Rolls two hoses simultaneously or separately to reduce rolling time
- Helps minimize lower back strain and injury risk
- Heavy-duty steel frame with powder-coated construction for the toughest environments
- Accommodates 50-ft. long hoses from 1.5 to 2 inches in diameter
- Equipped with advanced safety and control features for a smooth, consistent, and reliable rolling process

### General Description:

The RS-13021 Dual Electric Hose Roller is designed to help reduce lower back discomfort and injuries with its hands-free operating design. This unit automatically rolls two fire hoses either simultaneously or independently.

Built with two independently controlled rollers, the unit accommodates 1-1/2 to 2-inch hoses and significantly reduces hose handling time. A single 50 ft. hose can be rolled in approximately 60 seconds.

The RS-13021 is constructed from heavy-duty powder-coated steel for durability in demanding environments. It features advanced safety and control functions including Start/Stop, Slow Roll, Eject, automatic speed reduction near hose end, limit switch auto-stop, emergency stop buttons, and status indicators for safe and reliable operation.

The RS-13021 provides a fast, controlled, and efficient hose management solution for day-to-day use.

### Mechanical Specifications:

- Width: 31.19 inches
- Height: 29.09 inches
- Hose Reel Face Place Diameter: 20 inches

### Advanced features:

- Start/Stop Button
- Slow Roll Button
- Eject Button
- Speed
- Limit Switch
- Emergency Stop Buttons (Left / Right / Main)
- Indicators

### Frequently used with:

- RS-13014 Portable Stand for Dual Electric Hose Roller (*sold separately*)

### Compatibility:

- Hose diameters: 1.5 to 2 inches
- Hose length: 50 ft.

### Operation:

- Electric via standard AC outlet

### Material

- Body: Powder-coated steel
