

RS-14001

Portable Manual Fire Hose Roller (1 to 2.5 inches)

Features:

- Portable design makes it easy to transport and deploy at emergency sites
- Efficiently cuts rolling time in half
- Prevents lower back injuries and safe to operate
- Provides knee protection and comfort while operating
- Heavy-duty welded steel frame with powder-coated construction to withstand years of demanding use
- Accommodates hose sizes from 1-inch to 2.5 inches in diameter

General Description:

The RS-14001 portable manual fire hose roller is designed to help you reduce lower back discomfort and injuries so that you can feel great after workdays.

The RS-140001 enables firefighters to manually roll fire hoses measuring 1 to 2.5 inches in diameter. The RS-14001 is constructed from powder-coated steel resistant to cracking, peeling, chipping, abrasion, rust, and damage from chemical exposure.

The compact RS-14001 is easy to carry and store for transportation. It is ergonomically designed to minimize discomfort and strain in firefighters when rolling fire hoses in a kneeling position. The RS-14001 is built with a handle for easy lifting and transporting and a hand crank for manually rolling fire hoses. It has a tension roller supporting the hose and ensuring that it is tightly wound. It also features a side support handle to keep hose rolls aligned and a padded knee rest for protection and comfort while kneeling.

Mechanical Specifications:

- Width: 35 inches
- Height: 30 inches
- Weight: 25 lbs

Operation:

- Manual

Compatibility:

- Hose diameters: 1 to 2.5 inches

Material

- Body: Powder-coated steel

Warranty

- Five (5) years
